

Moenkopi Riverworks Fuel Surcharge Effective March 9th, 2026

As our economy is shifting and the price of fuel is rising, we are being forced to implement immediate change in our shuttle prices. Traditionally, the cost of our shuttle services has been structured on fuel prices being \$3 - \$4 per gallon here in Flagstaff, Arizona.

Initially, we had hoped that the rise of fuel costs would normalize but, unfortunately, we have not seen any drop in price. At the time of writing this, the cost of gasoline and diesel is rapidly rising.

As a result, we have been put into an unfortunate position where we will now need to put into effect a fuel surcharge for our shuttle services. We genuinely appreciate your understanding and hope that these changes will be temporary until things stabilize and the price of fuel drops back down to below our initial base cost.

Please note the immediate changes below, and the surcharge is per shuttle drive. For example, for a Gear Shuttle Drive to Lee's and Passenger Shuttle to Lee's, there would be 2 fuel surcharges.

At the time of your launch, if diesel prices are above \$4.50 / gallon in Flagstaff, AZ, a fuel surcharge will be added to any Gear Shuttle drive. And if the price of regular unleaded fuel is above \$4 / gallon, a fuel surcharge will be added to any Passenger Shuttle drive.

Shuttle Van and Gear Truck - Flagstaff to Lees Ferry: \$60/vehicle

Shuttle Van and Gear Truck - Flagstaff to Diamond Creek: \$70/vehicle

Shuttle Van and Gear Truck - Flagstaff to Pearce Ferry: \$90/vehicle
